Anil Govind Badiger

Computer Science Graduate | AI/ML | Computer Vision

+91 9019615968 | anilbadiger857@gmail.com | linkedin.com/in/anil-gb-901961agb | github.com/anilgb17 | Belgaum, Karnataka

SUMMARY

Computer Science and Engineering graduate with a CGPA of 8.76/10 and hands-on AI/ML experience through internship and academic projects. Skilled in Python, TensorFlow, OpenCV, NumPy, CNN-based image classification, image pre-processing, and model evaluation. Developed computer-vision solutions for real-time object detection and image classification. Seeking an entry-level AI/ML Engineer / Machine Learning Engineer role to build intelligent, data-driven applications.

EDUCATION

AGMRCET, Varur (Affiliated to VTU Belagavi) | Hubballi, Karnataka — *Dec 2022 – May 2026*

Bachelor of Engineering in Computer Science

CGPA: 8.76 / 10

TECHNICAL SKILLS

Languages : Python, Java, SQL, C, JavaScript

AI / ML : TensorFlow, CNN, Scikit-Learn, Image Classification, Model Training & Evaluation

Computer Vision : OpenCV, Image Pre-processing, Data Augmentation, Real-time Inference

Data & ML Tools : Pandas, NumPy, EDA, Jupyter Notebook

Database : MySQL, DBMS

Tools : Git, GitHub, VS Code

Core CS : Data Structures, OOP, Operating Systems

INTERNSHIP EXPERIENCE

Smart Learn EdTech | Bangalore, India — *Jan 2025 – Apr 2025*

AI/ML Intern

- Built CNN-based image classification models using TensorFlow, achieving 85.4% validation accuracy across 4+ categories.
- Accelerated model training by 15% through hyperparameter tuning and optimized data-preprocessing pipelines.
- Refined model architecture through iterative experimentation, achieving an 18% improvement in validation performance.
- Developed AI-powered image recognition solutions using Python, TensorFlow, OpenCV, and NumPy across 4+ classification categories.

Acaders | Bangalore, India — *Feb 2026 – May 2026*

Java Full Stack Intern

- Built and optimized Spring Boot REST APIs integrated with MySQL across 5+ application modules.
- Designed responsive web interfaces using React.js, HTML5, and CSS3 for cross-device compatibility.

PROJECTS

AI-Based Helmet and Mask Detection System for ATM Security

github.com/anilgb17/AI-Based-helmet-and-mask-detection-for-secure-ATM-transactions

- Deployed a real-time ATM security system using Python and TensorFlow, achieving 97.55% detection accuracy across 3 anomaly categories.
- Applied image pre-processing and augmentation techniques using OpenCV, improving model generalization on custom datasets.
- Trained and evaluated deep learning models on 4,000+ custom-labeled images, validating performance on real-time video feeds.
- Implemented real-time video inference using OpenCV and deep learning, achieving 25+ FPS on live CCTV feeds.

Car Service Management System (CSMS)

github.com/anilgb17/Car-Service-Management-System

- Engineered a full-stack web application using Java, Spring Boot, React.js, and MySQL with 10+ relational tables.
- Developed 15+ RESTful APIs and configured role-based access control using Spring Security and JWT.

KMF Dairy Sales & Distribution Analytics

github.com/anilgb17/KMF-Dairy-Analytics

- Performed EDA using Python (Pandas, NumPy) and SQL on simulated sales data across 10 Karnataka districts to identify regional trends and product performance.
- Created an interactive Power BI dashboard visualizing sales performance, channel profitability, and distribution metrics across 10 districts.

CERTIFICATIONS

- AI Business Intelligence Analyst – Skill India, NSDC | 2025
