Belgaum, Karnataka

SUMMARY

Computer Science and Engineering graduate with a CGPA of 8.76/10 and hands-on experience in Python, SQL, data analysis, and visualization through internships and self-developed projects. Skilled in Pandas, NumPy, Power BI, MySQL, exploratory data analysis, data preprocessing, and dashboard development. Developed an end-to-end dairy sales and distribution analytics project using simulated transaction data to analyze regional sales, product performance, and channel profitability. Seeking an entry-level Data Analyst role.

EDUCATION

AGMRCET, Varur (Affiliated to VTU Belagavi) | Hubballi, Karnataka
Dec 2022 – May 2026

Bachelor of Engineering in Computer Science
CGPA: 8.76 / 10

TECHNICAL SKILLS

Languages : Python, SQL, Java, JavaScript
Data Analytics & BI : Pandas, NumPy, Power BI, EDA
AI / ML : TensorFlow, OpenCV, Scikit-Learn
Database : MySQL, DBMS, CRUD Operations
Tools : Git, GitHub, VS Code, Jupyter Notebook
Core CS : Data Structures, OOP, Operating Systems

INTERNSHIP EXPERIENCE

Smart Learn EdTech | Bangalore, India
Jan 2025 – Apr 2025

AI/ML Intern

- Collected, cleaned, and pre-processed 4,000+ custom-labeled images using OpenCV and NumPy for model training.
- Built and evaluated CNN-based classification models using TensorFlow, achieving 85.4% validation accuracy across 4+ categories.
- Improved model performance by 18% through iterative data analysis, hyperparameter tuning, and pipeline optimization.
- Accelerated training pipelines by 15% through data augmentation and optimized pre-processing workflows.

Acaders | Bangalore, India
Feb 2026 – May 2026

Java Full Stack Intern

- Built 15+ backend endpoints integrated with MySQL, managing structured data across application workflows.
- Optimized database queries and REST API performance, reducing response latency by 25%.

PROJECTS

KMF Dairy Sales & Distribution Analytics
github.com/anilgb17/KMF-Dairy-Analytics

- Simulated sales and distribution transaction data across 10 Karnataka districts using Python for end-to-end analytics.
- Performed EDA using Python (Pandas, NumPy) to uncover sales patterns, product performance trends, and seasonal variations across regions.
- Queried and aggregated sales, distribution, and channel data using SQL to generate business performance metrics.
- Built an interactive Power BI dashboard visualizing sales performance, regional trends, and channel profitability across 10 districts.
- Analyzed channel profitability and product distribution patterns to identify regional and product-level trends.

AI-Based Helmet and Mask Detection System for ATM Security
github.com/anilgb17/AI-Based-helmet-and-mask-detection-for-secure-ATM-transactions

- Curated and labeled a custom dataset of 4,000+ images; applied data augmentation to improve model generalization.
- Trained deep learning models achieving 97.55% detection accuracy, analyzing model performance across 3 anomaly categories.
- Implemented real-time inference pipeline achieving 25+ FPS, validating system performance on live video data.

Car Service Management System (CSMS)
github.com/anilgb17/Car-Service-Management-System

- Designed a relational MySQL database with 10+ tables to manage customer, vehicle, and service records efficiently.
- Built 15+ RESTful APIs for structured data retrieval and management, reducing manual booking effort by 40%.

CERTIFICATIONS

- AI Business Intelligence Analyst – Skill India, NSDC | 2025
