Anil Govind Badiger

Computer Science Graduate | Software Engineer | Java Full Stack Developer

+91 9019615968 | anilbadiger857@gmail.com | linkedin.com/in/anil-gb-901961agb | github.com/anilgb17 | Belgaum, Karnataka

SUMMARY

Computer Science and Engineering graduate with a CGPA of 8.76/10 and hands-on experience in Java Full Stack Development through internship and academic projects. Skilled in Java, Spring Boot, React.js, MySQL, REST APIs, Spring Security, and object-oriented programming. Experienced in building backend APIs, database-driven applications, and responsive web interfaces. Seeking an entry-level Software Developer / Java Developer role to apply strong programming and problem-solving skills.

EDUCATION

AGMRCET, Varur (Affiliated to VTU Belagavi) | Hubballi, Karnataka
Dec 2022 – May 2026

Bachelor of Engineering in Computer Science

CGPA: 8.76 / 10

TECHNICAL SKILLS

Languages : Java, Python, SQL, C, JavaScript
Backend : Spring Boot, REST APIs, Spring Security, JWT
Frontend : React.js, HTML5, CSS3
Database : MySQL, DBMS
Tools / DevOps : Git, GitHub, Docker, Eclipse, VS Code
Cloud / Deployment : AWS (Basic), Vercel
Core CS : Data Structures, OOP, Operating Systems

INTERNSHIP EXPERIENCE

Acaders | Bangalore, India
Feb 2026 – May 2026

Java Full Stack Intern

- Optimized Spring Boot REST APIs through query refactoring and code improvements, reducing response latency by 25%.
- Built 15+ backend endpoints integrated with MySQL, streamlining application workflows and data management.
- Designed responsive web interfaces using React.js, HTML5, and CSS3, improving user experience across devices.
- Integrated frontend and backend services across 5+ modules to support seamless data exchange.

Smart Learn EdTech | Bangalore, India
Jan 2025 – Apr 2025

AI/ML Intern

- Built CNN-based image classification models using TensorFlow and Python, achieving 85.4% validation accuracy.
- Developed AI-powered image recognition solutions using Python, TensorFlow, OpenCV, and NumPy across 4+ classification categories.

PROJECTS

Car Service Management System (CSMS)
github.com/anilgb17/Car-Service-Management-System

- Engineered a full-stack web application using Java, Spring Boot, React.js, and MySQL with 10+ relational tables to streamline booking workflows.
- Implemented role-based access control (Admin/User) using Spring Security and JWT to secure application endpoints and user access.
- Designed and integrated 15+ RESTful APIs to manage customer, vehicle, and service records efficiently.
- Built a responsive frontend using React.js, HTML5, and CSS3, improving service tracking efficiency and user interaction.

AI-Based Helmet and Mask Detection System for ATM Security
github.com/anilgb17/AI-Based-helmet-and-mask-detection-for-secure-ATM-transactions

- Deployed a real-time ATM security system using Python and TensorFlow, achieving 97.55% detection accuracy across 3 anomaly categories.
- Trained and evaluated deep learning models on 4,000+ custom-labeled images using OpenCV for image pre-processing and augmentation.
- Implemented real-time video inference achieving 25+ FPS on live CCTV feeds.

KMF Dairy Sales & Distribution Analytics
github.com/anilgb17/KMF-Dairy-Analytics

- Simulated sales and distribution transaction data across 10 Karnataka districts using Python for end-to-end analytics.
- Performed EDA using Python (Pandas, NumPy) to uncover sales patterns, product performance trends, and seasonal variations across regions.
- Queried and aggregated multi-dimensional sales and distribution data using SQL, delivering business metrics for data-driven decision-making.
- Built an interactive Power BI dashboard visualizing sales performance, regional trends, and channel profitability across 10 districts.

CERTIFICATIONS

- AI Business Intelligence Analyst – Skill India, NSDC | 2025
