Anil Govind Badiger

Computer Science Graduate | AI/ML | Computer Vision

+91 9019615968 | anilbadiger857@gmail.com | linkedin.com/in/anil-gb-901961agb | github.com/anilgb17 | Belagavi, Karnataka

SUMMARY

Computer Science and Engineering graduate (CGPA 8.76/10) with AI/ML internship experience training CNN image classification models. Skilled in Python, TensorFlow, OpenCV, Machine Learning, Deep Learning, and model evaluation. Developed a real-time ATM security system for helmet and mask detection, achieving 97.55% accuracy at 25+ FPS on live video. Seeking an entry-level AI/ML Engineer / Machine Learning Engineer role to build intelligent, data-driven applications.

EDUCATION

AGM Rural College of Engineering and Technology Varur (AGMRCET), Affiliated to VTU Belagavi | Hubballi, Karnataka

Dec 2022 – May 2026

Bachelor of Engineering in Computer Science

CGPA: 8.76 / 10

TECHNICAL SKILLS

Programming Languages: Python

AI / Machine Learning: Machine Learning, Deep Learning, TensorFlow, PyTorch, scikit-learn, CNN, Model Training & Evaluation

Computer Vision: OpenCV, Image Classification, Object Detection, Image Preprocessing, Data Augmentation, Real-Time Inference

Data Analysis & Libraries: NumPy, Pandas, Matplotlib, Seaborn, EDA

Database: MySQL, SQL

Tools: Jupyter Notebook, Git, GitHub, VS Code

Core Computer Science: Data Structures and Algorithms (DSA), OOP, Operating Systems

EXPERIENCE

Acaders | Bangalore, India

Feb 2026 – May 2026

Java Full Stack Intern

- Built and optimized Spring Boot REST APIs integrated with MySQL across 5+ application modules.
- Designed responsive web interfaces using React.js, HTML5, and CSS3 for cross-device compatibility.

Smart Learn EdTech | Bangalore, India

Jan 2025 – Apr 2025

AI/ML Intern

- Built and trained CNN image-classification models in Python and TensorFlow across 4+ categories, improving validation accuracy from 67% to 85.4% through hyperparameter tuning and architecture iteration.
- Reduced training time by 15% by optimizing OpenCV/NumPy preprocessing and data-augmentation pipelines.

PROJECTS

AI-Based Helmet and Mask Detection System for ATM Security

github.com/anilgb17/AI-Based-helmet-and-mask-detection-for-secure-ATM-transactions

- Developed a real-time ATM security system using Python, TensorFlow, and CNN, achieving 97.55% detection accuracy across 3 categories: helmet worn, face mask worn, and face uncovered.
- Trained and evaluated deep learning models on 4,000+ custom-labeled images using OpenCV for image preprocessing and augmentation.
- Implemented real-time video inference pipeline achieving 25+ FPS on live CCTV feeds using OpenCV.

Car Service Management System (CSMS)

github.com/anilgb17/Car-Service-Management-System

- Engineered a full-stack web application using Java, Spring Boot, React.js, and MySQL with 10+ relational tables.
- Developed 15+ RESTful APIs to manage customer, vehicle, and service records.
- Implemented role-based access control (Admin/User) using Spring Security and JWT to secure application endpoints and user access.

KMF Dairy Sales & Distribution Analytics

github.com/anilgb17/KMF-Dairy-Analytics

- Performed EDA using Python (Pandas, NumPy) and SQL on simulated sales data across 10 Karnataka districts to identify regional trends and product performance.
- Created an interactive Power BI dashboard visualizing sales performance, channel profitability, and distribution metrics across 10 districts.

CERTIFICATIONS

- AI Business Intelligence Analyst – Skill India, NSDC | 2025
