Anil Govind Badiger

Computer Science Graduate | Data Analyst | Business Intelligence & SQL Developer

+91 9019615968 | anilbadiger857@gmail.com | linkedin.com/in/anil-gb-901961agb | github.com/anilgb17 | Belagavi, Karnataka

SUMMARY

Computer Science and Engineering graduate (CGPA 8.76/10) with hands-on experience in Python, SQL, Excel, data analysis, and visualization through projects and an AI/ML internship. Skilled in Pandas, Power BI, DAX, MySQL, exploratory data analysis, and data cleaning. Built an end-to-end dairy sales and distribution analytics project on simulated transaction data, producing an interactive Power BI dashboard on regional sales, product performance, and channel profitability. Seeking an entry-level Data Analyst role.

EDUCATION

AGM Rural College of Engineering and Technology Varur (AGMRCET), Affiliated to VTU Belagavi | Hubballi, Karnataka

Dec 2022 – May 2026

Bachelor of Engineering in Computer Science

CGPA: 8.76 / 10

TECHNICAL SKILLS

Programming Languages: Python
Query Language: SQL
Database: MySQL, Schema Design
SQL Concepts: Joins, Subqueries, Aggregations, CTEs, Window Functions
Data Analytics & Visualization: Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Data Visualization
Business Intelligence: Power BI, DAX, Power Query
Microsoft Excel: Pivot Tables, XLOOKUP
Tools: Jupyter Notebook, Git, GitHub, VS Code
Core Computer Science: Data Structures and Algorithms (DSA), OOP, Operating Systems

EXPERIENCE

Acaders | Bangalore, India

Feb 2026 – May 2026

Java Full Stack Intern

- Built 15+ backend endpoints integrated with MySQL, managing structured data across application workflows.
- Optimized database queries and REST API performance, reducing response latency by 25%.

Smart Learn EdTech | Bangalore, India

Jan 2025 – Apr 2025

AI/ML Intern

- Extracted, cleaned, and preprocessed 4,000+ custom-labeled images using OpenCV and NumPy, handling outliers and class imbalance for model training.
- Evaluated CNN-based classification models using TensorFlow, achieving 85.4% validation accuracy across 4+ categories.
- Analyzed model performance through iterative experimentation, achieving an 18% improvement via pipeline optimization.
- Reduced training pipeline runtime by 15% through data augmentation and optimized preprocessing workflows.

PROJECTS

KMF Dairy Sales & Distribution Analytics

github.com/anilgb17/KMF-Dairy-Analytics

- Simulated sales and distribution transaction data across 10 Karnataka districts using Python for end-to-end analytics.
- Performed EDA using Python (Pandas, NumPy) to uncover sales patterns, product performance trends, and seasonal variations across regions.
- Queried and aggregated sales, distribution, and channel data using SQL to generate business performance metrics.
- Built an interactive Power BI dashboard visualizing sales performance, regional trends, and channel profitability across 10 districts.

AI-Based Helmet and Mask Detection System for ATM Security

github.com/anilgb17/AI-Based-helmet-and-mask-detection-for-secure-ATM-transactions

- Curated and labeled a custom dataset of 4,000+ images; applied data augmentation to improve model generalization.
- Trained deep learning models achieving 97.55% detection accuracy, analyzing model performance across 3 anomaly categories.
- Implemented real-time inference pipeline achieving 25+ FPS, validating system performance on live video data.

Car Service Management System (CSMS)

github.com/anilgb17/Car-Service-Management-System

- Designed a relational MySQL database with 10+ tables to manage customer, vehicle, and service records efficiently.
- Built 15+ RESTful APIs for structured data retrieval and management across Admin and User roles.

CERTIFICATIONS

- AI Business Intelligence Analyst – Skill India, NSDC | 2025
